BACKGROUND

With over 20 years of experience, I offer expertise as a dedicated Technical Lead and Fronted Solutions Architect, adept at steering teams towards the delivery of high-performance applications. I specialize in integrating innovation with advanced frontend development techniques to deliver user interfaces that enhance the overall user experience. My track record includes optimizing developer workflows, ensuring codebase stability, and overseeing seamless deployments, leading to refined user interactions that foster increased engagement and business expansion.

PROFESSIONAL EXPERIENCE

JAN. 2020 - TO PRESENT

CARLSBERG GROUP | GROWTH PRODUCTS & DATA,
LISBON, PORTUGAL | REMOTE

Played key roles contributing to the company's e-commerce growth, achieving €1B sales per year. As a Solutions Architect, led Frontend Development, helping create the first Community of Practice and successfully growing it to improve our Developer Experience, as well as the quality of code. Architected Malty Design System, an open-source system for Carlsberg Group's global frontend needs.

Solutions Architect, December 2022 to Present

Architect for Malty Design System, January 2021 to Present

Principal Developer, March 2021 to December 2022

Lead Frontend Developer, January 2020 to March 2021

MAR. 2012 - JUNE 2019

GREYGOO, NAPERVILLE, ILLINOIS

As the Co-founder and Principal from March 2012 to June 2019, I led a diverse team comprising internal, near-shore, and off-shore members to develop high-caliber applications. Setting stringent development standards, managing operations and quality assurance, and nurturing strategic alliances were pivotal in providing cutting-edge web solutions that amplified engagement and outreach. Gew business to \$1M per year sales. Noteworthy achievements include guiding a team in creating web and mobile applications using popular frameworks such as Angular, React, and Ionic. Collaborations extended across diverse sectors, collaborating closely with prominent local enterprises like GO GROUND, facilitating their significant NCAA ground operations contract, and catering to a varied client base, including GM, Paulson Institute, and others.

Lead Angular Fronted Developer|December 2018 to April 2019

As the Lead Angular Frontend Developer overseeing a white-label home healthcare management system, I directed a dispersed team through all phases, from UX design and database schemas to UI implementation and project completion. Taking charge of all technical aspects, I managed client interactions, Angular development, team objectives, tasks, and project deliverables.

OCT. 2001 - ABR. 2011

TELECOMMUNICATIONS ENGINEER - NOKIA

Freelance Telecomm Engineer with 10+ Years of Experience Nokia Networks October 2001 – March 2011.

With a decade of project management experience in the wireless telecommunications industry. Led and supervised engineering teams and multiple external vendors, coordinating with cross-functional teams to ensure timely and efficient project delivery with multi-million dollar contracts. Strengthened client relationships through consistent internal reporting to consolidate operational efficiency and build strong business partnerships
